

**Amendments to the Specification:**

Amend the Paragraph beginning page 2, line 11, as follows:

One end of the wire 17, that is an inner part of a bowden cable 18, is secured to the wire arm 15 whereas the other end of the wire is secured to said throttle valve arrangement ~~(not shown)~~ 8 in the combustion engine carburetor. The throttle valve arrangement is under the influence of one or several springs that creates a pulling force on the wire arm 15 whereas the cover of the bowden cable 18 is secured to the chassis 10.
